The Oklahoma State University Center for Health Sciences educates and trains osteopathic physicians, scientists and health care professionals, with an emphasis on providing health care for rural and underserved areas of Oklahoma.

The OSU-CHS Physician Assistant Program aims to recruit, educate and mentor a diverse group of students to increase competent and compassionate health care with an emphasis on increasing access to health care in rural and underserved areas.

Our vision is to educate physician assistants to become highly-skilled clinicians who make a positive impact on their patients as well as their surrounding community.

The program also prioritizes fostering collaborative relationships between OSU-CHS’ athletic training students, medical students and physician assistant students early on in their career development so they can provide professional, flexible team-based health care.

Ideal candidates are from underserved or rural Oklahoma who want to give back to those communities.

The OSU-CHS PA Program is a 28-month program with 13 months of didactic training and 15 months of clinical training. The admission process for the PA program will begin in fall 2020 with the first 25 students anticipating to begin classes in July 2021.

ADMISSION REQUIREMENTS

- Applicants must have a baccalaureate degree from an accredited institution with a cumulative GPA of 3.0 or higher.
